

one-hot x W selects ONE row of W - that row IS Ես 's own vector

W (rows = words)

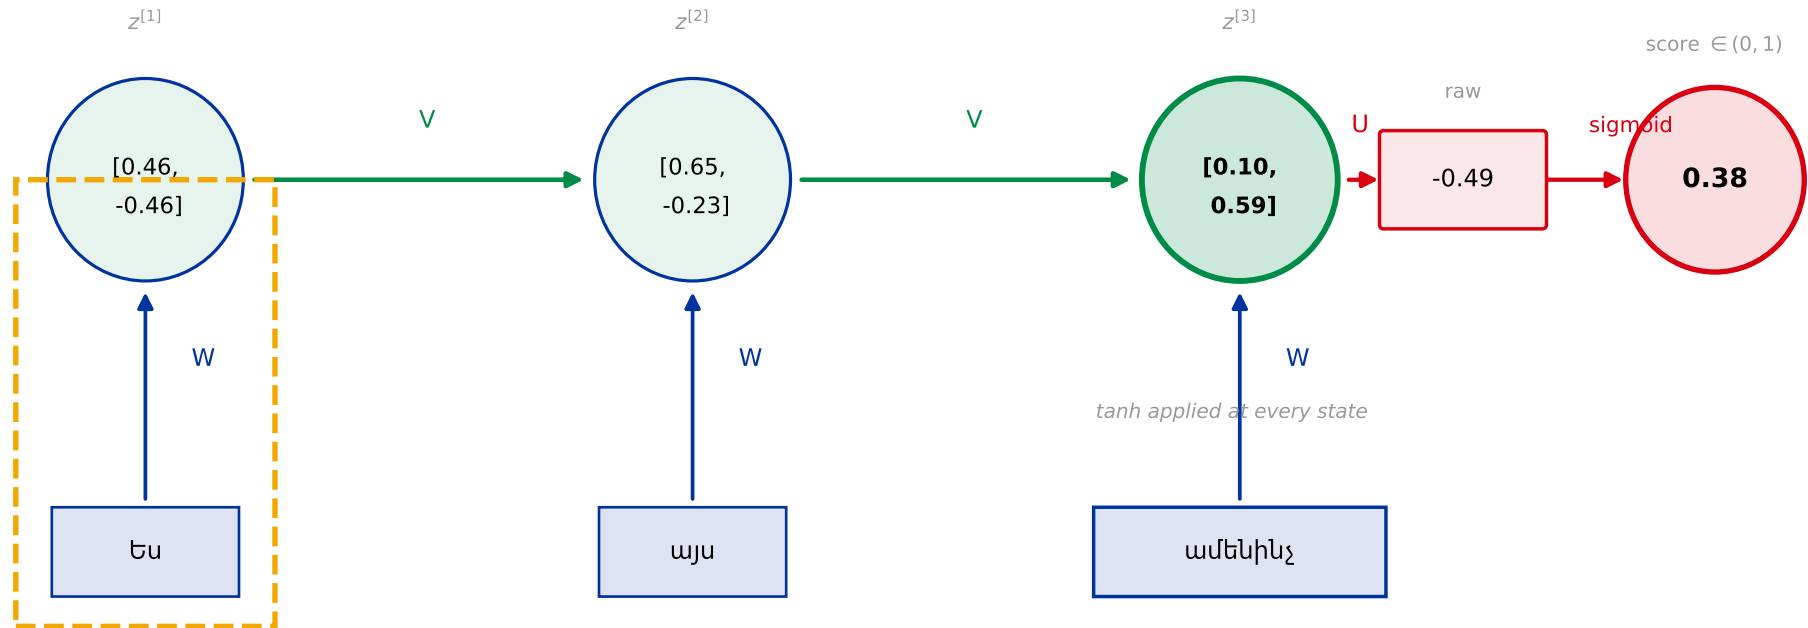

Ես $[+0.50, -0.50]$

այս $[+1.00, +0.00]$

ամենինչ $[+0.00, +1.00]$

$V = [[+0.5, -0.5], [+1.0, +0.0]]$ $b = [0, 0]$

$U = [+1.0, -1.0]$ $c = 0$

Next lecture: this row/column gets a name - an embedding.
